About Me

Unity Game Developer focused on scalable gameplay architecture, working on the combat and animation systems of **UFC: KO**.

Experience

Arvis Games, Software Engineering Intern

On **UFC: KO**, a licensed UFC title for iOS published by Rollic Games and live on the App Store, from the project's first week,

Remote
Feb 2026 – present

- Co-developed the combat engine: an attack-resolution pipeline (accuracy, block, crit, dodge) resolving 35 moves, 12 buff types and 8 on-hit effect types, and a deterministic tick-driven fight loop (Zenject, R3, UniTask).
- Developed the Unity Timeline-based fight animation system; wrote custom editor tools for designers and the QA team.
- Extended the seeded headless fight simulator and built an end-to-end economy simulator on top of it: simulates campaign progression match by match through the live game's command chain, with per-match CSV reports and first-N-match checkpoint analysis driving balance decisions.
- Contributed to the development of the meta game (progression system, reward flows, and FTUE).

Kodland, Freelance Unity Instructor

Taught Unity and C# fundamentals to 35 students aged 11–17 in Kodland's structured 40-week curriculum.

Remote
Dec 2025 – Mar 2026

- Delivered live lessons to mixed-ability groups, adapting pacing and explanations to each student's current level.
- Guided students from blank Unity project to playable prototype, debugging C# and gameplay logic alongside them.

Projects

Check and Defend (Itch.io)(Video)

2D Chess Tower-Defense Game (1st Place, Yıldız Jam 2026)

May 2026

- A jam game where one wave you defend your own king and the next you storm the enemy's.
- Wrote the turn-based combat loop, BFS pathfinding with line-of-sight checks, and chess-value enemy targeting (layered MVC, Zenject, UniTask).

Less is More (Itch.io)(GitHub)(Video)

2D Platformer Game (1st Place, BTK Academy Jam)

Dec 2025

- A jam game where every death leaves your corpse in the scene as a solid, persistent platform.

Raze Maze (Itch.io)(GitHub)(Video)

3D Puzzle-Platformer Game (Top 20 of 255, StartGate'25 Jam)

Dec 2025

- A jam game where you play as a rat in a pitch-black maze and use a sonar-like "sniff" ability to temporarily illuminate your surroundings.

Education

BSc Istanbul Aydın University, Software Engineering

- GPA: 3.37/4.00

Istanbul, Türkiye
Sept 2021 – June 2026

Google Artificial Intelligence and Technology Academy, Game Development

- Unity Basics, Advanced Unity, AI-Enhanced Game Development, Game Art, Project Management

Remote
Dec 2024 – Aug 2025

Skills

Technical Skills: C# (OOP, SOLID, MVC), Unity (2D/3D, URP), Git & GitHub

Unity Skills: Dependency Injection (Zenject), DOTween, Shader Graph, R3 Reactive Extensions, UniTask, Object Pooling, Editor Tooling

Languages: Turkish (Native), English (Fluent)
