About Me

Unity Game Developer specializing in scalable gameplay architecture for mobile.

Experience

Arvis Games, Software Engineering Intern

Remote

On **UFC: KO**, a licensed UFC title for iOS published by Rollic Games,

Feb 2026 – present

- Built the core combat engine from scratch: the attack-resolution pipeline (accuracy, block, crit, dodge), buff/stun and on-hit effect systems, and a tick-driven fight loop (Zenject, R3, UniTask).
- Developed the Unity Timeline-based fight animation system; wrote custom editor tools for designers and the QA team.
- Contributed to the development of the meta game (league system, reward flows, and FTUE).

Kodland, Freelance Unity Instructor

Remote

Taught Unity and C# fundamentals to 35 students aged 11–17 in Kodland's structured 40-week curriculum.

Dec 2025 – Mar 2026

- Delivered live lessons to mixed-ability groups, adapting pacing and explanations to each student's current level.
- Guided students from blank Unity project to playable prototype, debugging C# and gameplay logic alongside them.

Projects

Check and Defend (Itch.io)(Video)

May 2026

2D Chess Tower-Defense Game

- A jam game where one wave you defend your own king, or another wave storming the enemy's, with the same pieces, gold, and inventory carried between rounds.
- Wrote the turn-based combat loop, BFS pathfinding with line-of-sight checks, and chess-value enemy targeting (layered MVC, Zenject, UniTask).

Less is More (Itch.io)(GitHub)(Video)

Dec 2025

2D Platformer Game

- A jam game where every death leaves your corpse in the scene as a solid, persistent platform.

Raze Maze (Itch.io)(GitHub)(Video)

Dec 2025

3D Puzzle-Platformer Game

- A jam game where you play as a rat in a pitch-black maze and use a sonar-like "sniff" ability to temporarily illuminate your surroundings.

Education

BSc Istanbul Aydın University, Software Engineering

- GPA: 3.46/4.00

Istanbul, Türkiye
Sept 2021 – present

Google Artificial Intelligence and Technology Academy, Game Development

Remote

- Unity Basics, Advanced Unity, AI-Enhanced Game Development, Game Art, Project Management

Dec 2024 – Aug 2025

Skills

Technical Skills: C# (OOP, SOLID, MVC), Unity (2D/3D, URP), Git, GitHub

Unity Skills: Dependency Injection (Zenject), DOTween, Shader Graph, R3 Reactive Extensions, UniTask, Object Pooling

Languages: Turkish (Native), English (Fluent)
